### Profile

Web development and project management have seized my interest since 2006. Personally I believe that with a group of creative people working together towards a same goal, nothing is impossible when comes to web! It is the future!

### Experience

**System developer at Fronter, Pearson ---- 2010 - Now**

A new place where I can be involved in large scale of projects and also work in larger groups. It is a challenge to deal with a mixture style of huge lines of code. Here I go with agile development and use SCRUM as process. I have experienced being a SCRUM master and been leading a small group.

**Web developer at Trodon IT AB ---- 2006 - 2010**

Worked as a web developer dealing with various kinds of web solutions. From big company's commercial websites to small home page, I have got the freedom to choose latest web technologies to accomplish the tasks. Therefore, I have myself always updated with the latest news of web development.

### Education

- Bachelor of Applied Information and Technology, Specialized in Software Engineering and Management in IT universitu of Göteborg, 2006 - 2009
- Umeå University, course "Javascript and DOM", 2008.11 ~ 2009.01
- Umeå University, finished the course "Dynamic Web Design", 2007.10 ~ 2008.06
- Folkuniversitetet of Göteborg, English study program, 2005 ~ 2006.
- Shanghai University of Science and Technology, majored in Material Casting and Controlling, 2002 ~ 2005.

### Skills

PHP, Javascript/Ajax, Css/Html/Xhtml, MySQL, Javascript libs such as Prototype, Yahoo YUI3, JQuery, Zend Framework, Actionscript/Flex, Erlang, Drupal website development, Wordpress/Bbpress, SCRUM process.

### Personality

Optimistic in a reasonable way; Disciplined but also creative; Modest; Studious.

## Referrals

“Ming is the hard working person, but at the same time very social and open minded. His chinese background, with the very disciplined educational system there, has taught him extraordinary endurance and persistence. This together with the skill he has collected abroad, both from studying at the IT University in Sweden, and from working in development firms and projects adds up to a very competent software engineer. Ming also has a, as I have experienced it, unique willingness to share his skills and knowledge within the groups he is a part of, but also a very high ability to learn from others.”

---- **Karl Annerhult**

System developer @ Fronter, Pearson

Mobile: +46 73 089 1711

“Ming is something as unique as a perfect blend of cultures. The analytical, diligent and loyal trades of Chinese together with the great humor, independent attitude and ability to go beyond the task! I was studying with Ming at Göteborgs Universitet where I also coached him. I also had the pleasure of involving Ming in several projects with my own company where he delivered beyond the call of duty. To me Ming represents a metaphorical valium in projects where dead-lines were tight and the assignment complex. I have no hesitation recommending Ming to anyone and consider everyone who has the pleasure of working with him a winner.”
